The future of access and visitor management

Driving operational efficiency at every site and giving you the flexibility to adapt

eVisitor

MAXXESS

eVisitor

Manage your fast-changing premises requirements

Maxxess eVisitor lets you manage your sites more efficiently and adapt to the rapidly evolving building-use challenges that all organisations now face.

This proven technology lets you transform your visitor and employee experience – and your wider operations - by combining your security, safety, reception, and analyst functions in a single, powerful, flexible solution.

With eVisitor, you'll know exactly who is on site, where they are and when their access authorisations apply, for both your physical spaces and your corporate networks.

Make first impressions count

With eVisitor your staff, contractors and guests will enjoy a smooth, hassle-free welcome every time they arrive on site. They'll be impressed by delay-free access, clear information and helpful signposting delivered in advance, and no longer any need to wait in busy reception areas.

eVisitor will drive up your organisation's efficiency

▶ Easing pressure on busy reception and security teams

▶ Boosting productivity in the way your people use your facilities

▶ Letting you flex and adapt and to rapidly changing building use requirements.

eVISITOR GIVES YOU THE REASSURANCE OF COMPREHENSIVE CONTROL OVER SITE VISITS

A transformative solution - for your operations and your people

Maxxess eVisitor liberates your organisation from the old restraints that come with managing multiple premises and people.

It sets you free from cumbersome visitor sign-in books, and siloed record systems.
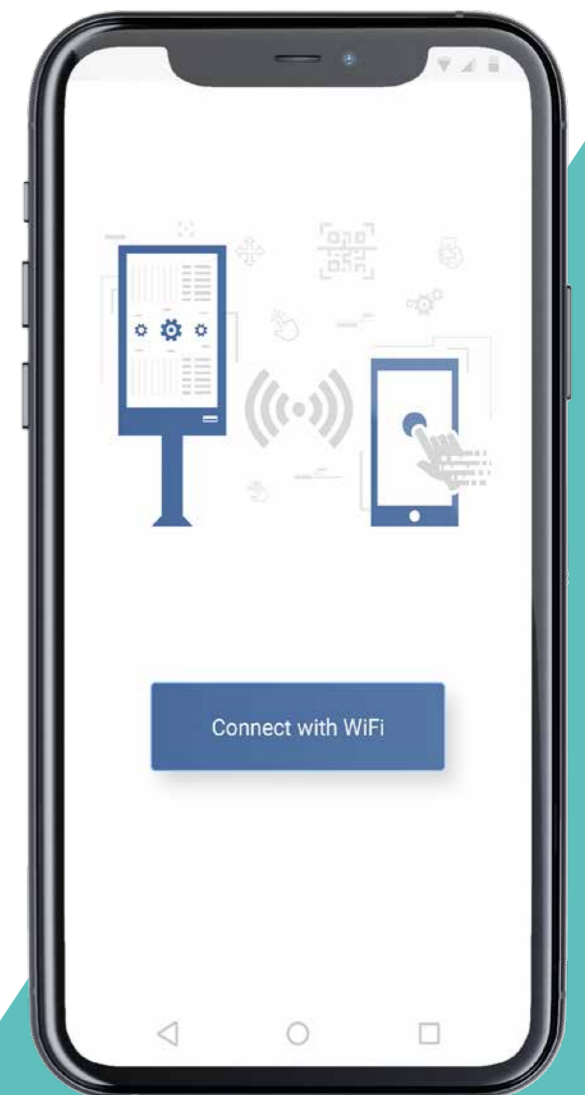

It integrates with Microsoft's Active Directory and other widely used databases, together with Outlook to allow all your visitor processes to be automated, securely.

You'll no longer have to worry about your reception staff struggling under pressure. Or be told that your visitors are frustrated by delays.

And you won't always be wondering if your premises and network security is being compromised by weak points in your systems.

eVisitor gives you the reassurance of comprehensive control – for all your access and visitor management, for all your sites and premises, across your whole operation.

Ensure a smooth experience for visitors and staff

Connect with WiFi

A powerful suite of visitor and access functions, tailored to the needs of every site

Maxxess eVisitor optimises the flow of people through all your site entrances and access-controlled areas, reducing delays on arrival even at the busiest of times.

By ensuring efficient admission for guests, staff and contractors, eVisitor eases pressure on reception teams yet still lets you maintain the highest level of security.

And eVisitor gives you full oversight of activity, with comprehensive audit tools and reports.

Choice of ID options, notifications and tracking

Replace outdated and inefficient paper sign-in systems

Integrates with full security, emergency and building systems

Advanced, automated functions reduce the burden on reception desks

Customise and adapt your systems as your needs change

Improve security with detailed monitoring and audit options

Make guest arrival faster, simpler and more impressive

Streamline guest and room bookings with easy integration to Microsoft Outlook, Google Calendar and other diary systems

Avoid queuing and reduce waiting times with sign-in kiosks or tablets customised with your own branding

Giving you the flexibility to streamline smaller, stand-alone locations

Maxxess eVisitor includes a flexible array of tools and functions to let you optimise operations in the way best suited to every site.

And it integrates seamlessly with established business processes and software – including Microsoft Outlook – making it easy for all authorised members of your management teams to use it.

From booking meeting rooms and sending visitor access permissions to guests, to allocating courtesy parking, eVisitor puts your people in control and lets them work more efficiently.

And it lets your organisation adapt to changing workflows and patterns of building use, with the ability to automatically update access permissions from your central staff database.

Simple but powerful solutions to suit your site

For stand-alone sites: how eVisitor enables efficient access.

eVisitor is used to easily book meetings (through Outlook), and send confirmations with QR codes

When the visitor arrives they present the QR code to the IP intercom and reader for rapid access

At reception, you can choose between allowing visitor self-enrolment or requiring manual ID checks before admission

The relevant host has already been automatically notified to come and meet their guest – they use their own QR code to gain access via IP and video intercoms

High-level visitor security for mission-critical sites

Mission critical applications: managing contractors securely with facial recognition tracking

eVisitor is used to easily book contractor (through Outlook), and send confirmations with QR codes

When the contractor arrives LPR/ANPR allows rapid access, followed by manual ID checks at reception

The contractor is enrolled via facial recognition to allow movements to be tracked and reported

Improving arrivals efficiency across all your site

For multiple locations and branches: how eVisitor approvals arrivals efficiency between sites

eVisitor is used to schedule staff movements between specified locations (through Outlook), and send confirmations, with vehicle registration details, QR codes etc.

When staff arrive, they present their QR code to IP intercoms, kiosks or tablets for rapid access to facilities and authorised networks.

Meetings can also be pre-booked, rooms reserved, and colleagues notified when that staff member arrives.

If staff are enrolled on facial recognition their movements can be tracked and audited.

Smoother running for complex, multi-site operations

Maxxess eVisitor allows staff and contractors to be more easily assigned to flexible working locations – with updated, site specific information sent in advance. QR codes presented to access/intercom stations for rapid admission.

Meeting rooms and other facilities can be reserved and allocated, network access cab be enabled, and staff can work more flexibly with more efficient scheduling.

Maxxess eVisitor does more than just secure your premises and enhance your visitor experience, it drives up efficiency and productivity at all your locations. At a time of such unprecedent challenge and rapid change, this has never been more important.

Managing higher risks with the security level you choose

Maxxess eVisitor lets you set your security level exactly according to your risk, and lets you choose how your visitors are welcomed. For example, when vehicles arrive, LPR/ANPR allows first level automated identification at the perimeter, followed by driver and passenger ID checks. If required, this can be backed-up by enhanced verification at reception, with facial recognition technology.

And when visitors are enrolled via facial recognition, this allows their movements to be tracked and monitored around your sites, with full audit trails for verification of events.

Meanwhile when visitor arrivals to meeting-only areas present lower risks, rapid but secure access can be enabled simply by scanning the pre-issued QR codes.

Automated and secure flow of goods

Easier deliveries with number plate recognition

eVisitor is used to book deliveries and collections. automating confirmations with vehicle registrations and sending associated QR codes

When the contractor arrives ANPR allows rapid access, followed by manual ID checks at reception

At the loading area your staff or devices scan the QR code for confirmation of the delivery or collection

Smoother arrival and enhanced welcome for VIP visitors

eVisitor is used to easily book VIP visits

When the VIP guests arrive ANPR allows priority access to site

You can choose how your VIP guest are welcomed at reception, with courtesy ID checks or other verification such as facial recognition before admission

Meanwhile the relevant hosts have already been automatically notified to come and greet their guests – they use their own QR code to gain access

Dramatically improve operational efficiency and enhance your visitor and employee experience

eVisitors finctionality let you automate pre-screening of visitors, contractors, and delivery drivers, and optimise the entire visitor management process, from frictionless access to recording movements and dwell times around facilities:

- Visitors and staff can automatically receive secure one-time QR codes via email or mobile apps, ahead of every visit.

- Updated site information and health & safety instructions can be sent ahead too, with acknowledgement required.

- On arrival, clear messaging can guide the visitor from allocated car parking or transport links to the correct entrance.

- At the appropriate entrance, visitors and staff can use contactless kiosks or anti-viral touch screens to gain access, and they can be provided with courtesy hand gel and hygiene reminders whenever infection risks need to be reduced.

- Permit frictionless and even contactless access with multi-factor authentication.

- Hosts can be automatically informed of guest arrivals in good time to ensure an efficient welcome.

- Meeting rooms and other facilities can be reserved, and schedules managed efficiently.

- Staff can work more flexibly, moving from location to location without the need to visit security in person every time – and access to premises and networks can be granted, or denied, according to current operational status.

Pivot your operations more quickly - to deal with emerging challenges

Organisations are facing an era of unprecedented disruption, and across the world resilience is being tested as never before. To prosper, companies and public agencies need to adapt quickly, deal with setbacks, and reduce recovery time.

eVistor lets you optimise your operations to all circumstances, allowing complete flexibility with variable, dispersed and remote working patterns.

CREATE A SAFE, SECURE, AND MORE PRODUCTIVE WORKING ENVIRONMENT

eVisitors ensures that you:

▶ Adapt to meet changing site occupancy requirements.

▶ Maintain immediately accessible records of who has been on site, and when.

▶ Keep up to date with changing access authorisations, no matter how fast moving or complex.

▶ Integrate your staff and scheduling systems with your access infrastructure.

▶ Create a safe, secure, and more productive working environment for staff, contractors and visitors.

▶ Optimise your reception and security operations to ease pressure, ensure smooth people-flow, and make the best use of resources.

And above all Maxxess eVisitor gives you unprecedented control of how people access your sites, making it easy to pivot your operations from week to week, from day to day, to face the future with confidence.
